**ST. PETERS MAN IS SENTENCED TO 6.5 YEARS IN FEDERAL
PRISON FOR POSSESSION OF CHILD PORNOGRAPHY**

ST. LOUIS, Missouri - Michael Kincade was sentenced to 78 months in prison on charges of possessing over 600 images of child pornography on his computer, U.S. Attorney Catherine L. Hanaway of the Eastern District of Missouri announced today.

On September 28, 2005, investigators for the St. Charles County Sheriff's Department conducting an on-line peer-to-peer undercover operation determined that a computer located at the residence of Michael Kincade contained images of child pornography. On-line peer-to-peer programs allow computer users to share computer files containing pictures, videos, or music. On November 23, 2005, the same investigators executed a search warrant at his residence and found over 600 images of child pornography on his computer. Kincade admitted possessing this child pornography and admitted obtaining it over the Internet using a software program known as "Limewire Pro." A subsequent forensic examination determined that the child pornography involved children under the age of 12 engaged in sexually explicit conduct.

Kincade, 58, 1000 block of Kimberly Lane, St. Peters, Missouri, pled guilty last December to one felony count of possession of child pornography. He appeared today for sentencing before United States District Judge Catherine D. Perry.

This case is being brought as part of Project Safe Childhood. In February 2006, Attorney General Alberto R. Gonzales created Project Safe Childhood, a nationwide initiative designed to protect children from online exploitation and abuse. Led by the United States Attorneys Offices, Project Safe Childhood marshals federal, state and local resources to better locate, apprehend, and prosecute individuals who exploit children via the Internet, as well as identify and rescue victims. For more information about Project Safe Childhood, please visit www.projectsafechildhood.gov/.

Hanaway commended the work on the case by the St. Charles County Sheriff's Department and the Bureau of Immigration and Customs Enforcement as part of the Regional Computer Crimes Education and Enforcement Group.
